INDUSTRIES HONORED FOR BEING “GOOD CORPORATE CITIZENS”

Whittier, California – The Sanitation Districts of Los Angeles County today sent Certificates of Recognition to 438 companies for being “good corporate citizens” for the year 2016. These companies have met their limits for wastewater discharge for at least a year, maintained their environmental equipment and fulfilled all permit requirements. Of these companies eighty-six have received this recognition for more than five consecutive years.

“To protect public health and the environment and provide a high level of service, we require our industrial dischargers to meet all Federal and local standards,” remarked Grace Robinson Hyde, Chief Engineer and General Manager of the Sanitation Districts. “The dischargers being recognized have been exemplary in consistently meeting these requirements. Their efforts help us to effectively operate our wastewater collection and treatment systems, which benefits all of our ratepayers.” Ms. Hyde announced the certificate awardees at the meetings of the Sanitation Districts’ Boards of Directors.

“The recipients of these awards are eager to work with the Sanitation Districts in its mission to protect the environment,” said Sam Bell, owner of Metal Surfaces, Inc., of Bell Gardens and chair of the Sanitation Districts’ Industry Advisory Council. “The award provides an incentive for Southern California industries in Los Angeles County to achieve consistent compliance with regulations, and save water and energy.”

The idea for the Certificates of Recognition originated with the Sanitation Districts’ Industry Advisory Council, an advisory group of 21 representatives from different industrial sectors. The Council and the Sanitation Districts felt it was important that industries with good compliance records be recognized. The Recognition Program is now in its twenty-first year.

“This Program acknowledges industries for working with local government and for helping our agency to maintain high standards and to successfully convert wastes into resources,” added Dave Snyder, head of the Sanitation Districts’ Industrial Waste Section.

The Sanitation Districts are a regional public agency consisting of 24 independent special districts serving over 5.6 million people in 78 cities and the unincorporated territory within Los Angeles County. The Sanitation Districts protect public health and the environment through innovative and cost-effective wastewater and solid waste management and, in doing so, convert waste into resources such as reclaimed water, energy and recycled materials.
