Los Angeles County Sanitation Districts Provide \$4 Million Contribution to City of Rancho Palos Verdes for Landslide Mitigation

Whittier, CA (September 25, 2025) The Los Angeles County Sanitation Districts Board of Directors has authorized a one-time \$4 million contribution to the City of Rancho Palos Verdes to support landslide mitigation efforts in the Portuguese Bend area.

The Sanitation Districts have been working very closely with the City Rancho Palos Verdes for over the past year to help protect and maintain operation of sewer infrastructure impacted by the Portuguese Bend Landslide. The City's recent stabilization work has effectively demonstrated its ability to mitigate land movement and reduce stress on sewer trunk lines that transport wastewater out of the area for treatment. The Sanitation Districts believe this contribution will help build on those efforts and will assist to further protect our critical infrastructure that serves the region.

Collaborative efforts between the Los Angeles County Sanitation Districts and the City of Rancho Palos Verdes will continue to safeguard the community from potential sewer system failures and maintain public health safety. This investment will directly benefit our Joint Outfall System service area by strengthening the reliability of the pipe and pump system that services this region.
