

Industrial Waste Discharge Permittee:

Attestation of Intent to Comply
Stormwater, Groundwater, and Other Water Discharges

The Los Angeles County Sanitation Districts' [Wastewater Ordinance](#)¹ strictly prohibits the discharge of rainwater, stormwater, and drainage (collectively referred to as stormwater herein) into the sanitary sewer, except under approved conditions outlined in the discharge requirements for '*Stormwater, Groundwater, and Other Water Discharges*' ([Guidelines](#))².

Revisions to these Guidelines have recently been adopted, which may affect your facility. A letter describing these changes, including this Form of Attestation, Fact Sheet, and Submittal Checklist, is being provided to all existing facilities currently holding an Industrial Waste Discharge Permit.

To ensure compliance with the revised Guidelines, the Sanitation Districts request that your facility complete and submit this attestation to email address listed below. This attestation confirms your understanding of the revised Guidelines and your intention to comply. Please submit this completed form within 30 days of receipt.

Attestation ([Electronic File](#))

Our company/facility:

- 1) Acknowledges that the Sanitation Districts Guidelines for the discharge of stormwater to sanitary sewers have been revised and that these changes may affect our facility.
- 2) Understands the scope and specific requirements outlined in these revised Guidelines on the Sanitation Districts' internet site, and as explained in the accompanying letter, Fact Sheet, and Submittal Checklist.

Check all that apply:

- Attests that our company/facility already complies with the revised Guidelines on the Sanitation Districts' internet site, and as explained in the accompanying letter, Fact Sheet, and Submittal Checklist.
- **or** (check all that apply) -
- Identifies that the company/facility has an area(s) exposed to stormwater that drains to the sanitary sewer which is currently not permitted, or was previously exempted from permitting (less than 400 square feet). The company/facility commits to comply with the requirements of the revised Guidelines by the September 1, 2026 compliance date. The company/facility also commits to submit the Submittal Checklist indicating their compliance plan within 90 days of receipt of the notification letter, Attestation, Fact Sheet, and Submittal Checklist.

² <https://www.lacsd.org/services/wastewater-programs-permits/industrial-waste-pretreatment-program/industrial-waste-policies>

- Identifies that the company/facility has a rain switch associated with a rain diversion system that automatically resets the rain diversion system and is not capable of detecting active rainfall and preventing reset to the default position until 24 hours after cessation of the storm. The company/facility commits to comply with the requirements of the revised Guidelines by the September 1, 2026 compliance date.

The Form of Attestation may be emailed (preferred) or sent via hard copy to the address listed below.
