Boards of Directors
County Sanitation Districts Nos. 4, 9, 14, 20, and
Santa Clarita Valley Sanitation District of Los
Angeles County

Directors:

Wastewater Revenue Program for Fiscal Year 2026-27

The agendas for the upcoming meetings of the Boards of Directors contain an item regarding the District's service charges for residential, commercial, and small industrial dischargers which are collected on the property tax roll.

Service charge rate ordinances have previously been adopted by the Boards and no changes are being proposed to these ordinances. However, to continue to collect the service charge on the property tax roll, the Boards will consider taking certain actions. Specifically, pursuant to state law, the Boards will consider to: (1) order a Service Charge Report be filed with the District Clerk; (2) establish the date, time, and place for a public hearing on the report; and (3) order the publication of the required notices.

BUDGET FOR FISCAL YEAR 2026-27

Enclosed for your review is the preliminary budget for fiscal year 2026-27, a list of user fees, information on the monies set aside in various funds and reserves, and an explanation of terms used in the budget. The funds and reserves were established and funded in accordance with the Districts' *Wastewater Financial Reserve Policy*.

SERVICE CHARGE AND SURCHARGE RATES

No change to previously adopted rates is proposed for fiscal year 2026-27. Multi-family residential units pay 60 percent of the adopted single-family home (SFH) rate and condominiums pay 75 percent of the adopted SFH rate. Likewise, commercial and industrial dischargers pay in proportion to their use of the wastewater management system compared to an SFH. Dischargers with verified low water usage (particularly seniors and retirees) may qualify for a reduced charge.

LOW WATER REBATE PROGRAM

The cost of metering wastewater discharges from individual parcels is impractical and cost prohibitive. Hence, discharges are estimated using standard loading factors based on the size and types of facilities located on the parcel. With ongoing efforts by local communities to conserve water and install low-flow plumbing fixtures, many parcels may be discharging at lower rates than currently estimated. The Districts' low water rebate program allows parcel owners to apply for a reduction in their service charge rate based on their actual water usage.

SUMMARY OF REQUIRED ACTIONS

As discussed above, the Board will consider the filing of a Service Charge Report with the District Clerk. The Boards will also consider scheduling a public hearing and instruct the District Clerk to publish newspaper notices to inform the public of the hearing. After the public hearing is closed, the Boards will consider adoption of the Service Charge Report, as is required under the California Health and Safety Code for the District to continue to collect the previously adopted wastewater service charge as a separate line item on the property tax roll. This is the most cost-effective and efficient means of collecting the service charges. It is recommended that the public hearing be set for the date, time and location listed on the agenda.

At the June Board meetings, final budgets will be presented to the Boards for consideration as part of the overall budgetary process, adoption of which will authorize budget appropriations. In addition, the Boards will consider taking certain administrative actions that are required of all agencies that receive ad valorem taxes. These include establishing by resolution the amount of the tax levy Districts will request from the Los Angeles County Tax Collector and adopting a limit on authorized expenditures of tax proceeds.

Very truly yours,

Robert C. Ferrante

COUNTY SANITATION DISTRICT NO. 9 OF LOS ANGELES COUNTY SERVICE CHARGE REPORT FOR FISCAL YEAR 2026-27

INTRODUCTION

County Sanitation District No. 9 of Los Angeles County (District No. 9) encompasses portions of the City of Los Angeles and unincorporated Los Angeles County.

District No. 9, unlike other Sanitation Districts within the urbanized Los Angeles basin, does not own treatment and disposal facilities. District No. 9 contracts for treatment and disposal services with the City of Los Angeles. These services are essential to protect the public health of the people served by the system.

District No. 9 must provide the revenue required to operate and maintain, including capital costs, its proportionate share of the facilities owned by the City of Los Angeles. The general revenue sources currently available to the District include a pro rata share of the ad valorem (property) taxes, service charges, interest income and reserves.

SERVICE CHARGE DESCRIPTION

The supplemental revenue required under the *Master Service Charge Ordinance of County Sanitation District No. 9 of Los Angeles County* will be allocated among classes of developed parcels of real property on the basis of use of the sewerage system. The revenue derived from the service charge will be used for operation and maintenance and capital costs.

All industrial dischargers in District No. 9 discharging more than 1.0 million gallons per year are required to file a wastewater treatment surcharge statement as prescribed in the *Wastewater Ordinance* to pay their appropriate share of the costs based on their use of the sewerage system. All other users of the sewerage system, except for contractual and local government users, will pay service charges.

The basic term used to define the service charge is a sewage unit (SU). A sewage unit represents the average daily quantity of sewage flow and strength from a single-family home measured in terms of flow, chemical oxygen demand (COD), and suspended solids (SS). The number of sewage units per unit of measure shall be determined by the following formula:

$$\text{SU} = A \left(\frac{\text{FLOW}_{\text{avg}}}{\text{FLOW}_{\text{sfh}}} \right) + B \left(\frac{\text{COD}_{\text{avg}}}{\text{COD}_{\text{sfh}}} \right) + C \left(\frac{\text{SS}_{\text{avg}}}{\text{SS}_{\text{sfh}}} \right)$$

where:

- A = The proportion of the total operation and maintenance and capital costs required for conveyance, treatment, and disposal of wastewater for the fiscal year attributable to flow;
- B = The proportion of the total operation and maintenance and capital costs required for conveyance, treatment, and disposal of wastewater for the fiscal year attributable to COD;
- C = The proportion of the total operation and maintenance and capital costs required for conveyance, treatment, and disposal of wastewater for the fiscal year attributable to suspended solids;

**COUNTY SANITATION DISTRICT NO. 9 OF LOS ANGELES COUNTY
SERVICE CHARGE REPORT FOR FISCAL YEAR 2026-27**

- FLOW_{sfh} = Average flow of wastewater from a single-family home in gallons per day;
- COD_{sfh} = Average loading of COD in the wastewater from a single-family home in pounds per day;
- SS_{sfh} = Average loading of suspended solids in the wastewater from a single-family home in pounds per day;
- FLOW_{avg} = Estimated flow of wastewater which will enter the sewerage system from a user in gallons per day;
- COD_{avg} = Estimated loading of COD which will enter the sewerage system from a user in pounds per day;
- SS_{avg} = Estimated loading of suspended solids which will enter the sewerage system from a user in pounds per day.

The A, B, and C factors, defined above, are periodically adopted by the District No. 9 Board of Directors, the most recent adopted values can be found in *An Ordinance Prescribing the Service Charge Rate and Mean Loadings per Unit of Usage for County Sanitation District No. 9 of Los Angeles County*.

The service charge per sewage unit is determined by dividing the total required supplemental revenue by the total number of sewage units in District No. 9. The service charge for each parcel is determined by multiplying the service charge per sewage unit by the number of sewage units attributable to the parcel, which in turn, is determined by the class of real property and the sewage unit formula and the flow, COD and SS loadings from the User Categories and Mean Loadings, periodically adopted by the Board of Directors of District No. 9.

Based upon presently anticipated sources of funds, the service charge rate for fiscal year 2026-27 is \$0 per sewage unit. Parcels with significantly lower water usage may be eligible for a reduced rate pursuant to the terms of the *Master Service Charge Ordinance of County Sanitation District No. 9 of Los Angeles County*.

DESCRIPTION OF PARCELS RECEIVING SERVICES AND IDENTIFICATION OF AMOUNT OF CHARGE FOR EACH PARCEL

All parcels of real property within the 2026-27 Tax Rate Areas as shown in Table 1 are receiving or benefiting from the services and facilities of District No. 9. Said parcels are more particularly described in maps prepared in accordance with Section 327, Revenue and Taxation Code, which are on file in the office of the Los Angeles County Assessor, which maps are hereby incorporated herein by reference.

All commercial and institutional parcels assessed a service charge based on the Los Angeles County Assessor's current tax roll shall be charged on the basis of not less than one (1.0) sewage unit.

No charge shall be imposed on the owner or owners of any parcels as to which the fair market value of improvements is less than \$1,000 as determined on the basis of the Los Angeles County Assessor's current tax roll. This assumption is predicated on the fact that this type of parcel would be a vacant piece of land; however, should subsequent evaluation reveal that the property is not vacant, then an appropriate service charge would be levied.
